

===== 4/8/2023, Sprint review meeting - Sprint 4 =====

Team members present:

- Nguyễn Lê Hoàng Kha
- Trần Hiếu Tâm
- Phan Thái Khang
- Phạm Gia Tuấn Khải
- Nguyễn Tuấn Tuấn

Team members absent:

- None

What worked well:

1. Group completed all the requirements of PA3 on time.
2. Coding progress tasks were finished on time.

What went wrong:

1. Group was having difficulty in finding the correct way to draw a package diagram which led to needing changes at the end of the sprint.
2. One team member had a problem of losing the source code due to not understanding Git well.
3. Could not find a solution for frontend pagination in the Homepage page.

What can be done differently in the next sprint to improve the project:

1. Team members need to carefully use Git and save source code outside the Git repository in order to avoid losing source code again .
2. Team needs to focus on coding now due to few requirements in the next PAs.

What lessons we could learn:

1. Everything must be stored and edited carefully such as source code and documents.
2. Group has to do everything in advance and spare at least one week to revise the products.
