Updating use-case model	Kha Nguyễn Lê Hoàng Tâm Trần Hiếu
Updating use-case specification	Tâm Trần Hiếu Tuấn Nguyễn Tuấn

Members	What have I done since last week?	What will I do until next week?	What issues / problems /obstacles do I have?
Nguyễn Lê Hoàng Kha	Assigned tasks of PA3 for members. Keep track of member progress.	Doing user part of PA3 including SAD and Class Diagram	The progress was slowed down due to being occupied by midterm

			examinations.
Trần Hiếu Tâm	Preparing to write and complete Use-Case Specification for librarian.	Preparing some sample data for the system. Prepare and complete the next PA part related to the librarian user.	Self-made an impractical scheduling decision resulting in a delay in the group's deadline
Phạm Gia Tuấn Khải	Reviewing the Use - Case specification for the Admin Reviewing the comments on the Non-functional Requirements section and making adjustments accordingly	Review the previous work on the webpage's source code and continue with the back-end development	External factors like examinations and project deadlines from other subjects contributed to the slower progress made during last week
Nguyễn Tuấn Tuấn	Reviewing use-case specification admin part. Made some changes to the use-case diagram admin part.	Prepare for the PA3 requirements. Make note of the importance requirement of PA3.	Midterm examination made the progress slow down. Still have problems with coding.
Phan Thái Khang	The reader's homepage interface is almost complete. Created a new branch containing front end interface files and is designing other frontend pages for the reader.	Continue to divide the front end work with Pham Gia Tuan Khai. Find more users who need to create a user-friendly interface. The goal is to basically complete the book search page	Having trouble designing user-friendly interfaces. The interface is highly responsive, not aesthetic. Because it takes time to experience many different websites.
